

PROJECT SCOPE STATEMENT	
<b>Project Name</b>	UniGo
<b>Project Deliverables</b>	<b>Detailed Description</b>
Web Application	A progressive web application that can be used on a computer as well as a mobile device for the convenience of its users.
Manage Bookings	Users get the option of searching for rides, option to choose their desired rider/driver, and also manage the history of all their previous rides. The history will display the information regarding their previous rides (I.e., the from and to locations, the driver, the rider, the car used)
Payment Processing	A secure payment method will be use towards the end of every ride, where the amount will be deducted from an inbuilt wallet, and provided to the driver
Driver management	Driver will get the option of maintaining vehicle records, preferences for the rides, ride history, ability to search for other riders in a given proximity, and the ability to schedule the rides for their convenience.
Mapping Services	The app will be integrated with GPS and mapping services to provide real-time location tracking and estimated time of arrival (ETA) for riders.
Request a ride	The app will allow riders to request a ride from their mobile device and track the driver's progress in real-time.
Driver Progress (Ratings and earnings)	The app will allow riders to request a ride from their mobile device and track the driver's progress in real-time. The app will provide a mechanism for riders to rate their experience, and the backend system will manage the driver's earnings.
Payment Wallet	The app will include a payment processing system that supports multiple payment options, including credit cards, PayPal, and in-app payments. A wallet system will be used to keep the pre-loaded amount for rider as well as the earnings of the driver.
Manage Ride Requests	The backend system will manage the incoming ride requests and match riders with available drivers. The system will also manage the acceptance and completion of rides.
<b>Project Exclusions</b>	
<ol style="list-style-type: none"> <li>1. Marketing and promotional materials for the platform</li> <li>2. Development of IOS and android mobile applications</li> <li>3. This is not a cab service in any manner.</li> </ol>
